DETAILED ACTION

Allowable Subject Matter

1. Claims 1-18 are allowed.

The prior art of record fails to teach, disclose, or suggest, either alone or in combination a vibration type actuator comprising an elastic member having a hollow central portion formed along an axial direction, a fastening member located on an inner periphery portion of said elastic member, an output shaft which penetrates the hollow central portion of the elastic member, a moving member in press contact with the driving portion of said elastic member, and which rotates together with said output shaft; and a bearing member located between said elastic member and the fastening member and which journals the output shaft. Therefore, the limitations contained on claim 1-18 are considered to be in condition of allowance.
